Publisher: Cords & Cardigan Press

Havock by Dan Forrester

Havock is a comic fantasy that would appeal to fans of Game of Thrones if it had been written by Terry Pratchett. At the heart of the story is Dill, whose journey leads him to discover love and friendship, his family and eventually his place in the world.

Low Havock is under attack from the barbarian tyrant Lord Gorab, and there's only one thing that can save it. Trouble is, no one knows what it is. So, when young warrior Dill, his wizard friend Wuzzbright and the dwarf Colossus set out to find it, the odds are stacked against them. To make matters worse, Dill is obsessed with maidens, Wuzzbright only knows one spell, and Colossus would start a fight with his own reflection if it stared back.

Naturist cannibals, a tone-deaf Siren and a pompous parrot are the least of their problems; Gorab is looking for a new wife and has taken a fancy to Wuzzbright.

‘A highly inventive fantasy with engaging characters and non-stop action’
- Melinda Hammond, author

‘*Havock* celebrates the fantasy genre while sending it up rotten’
- Bill Broady, author

About the author

Dan Forrester graduated from college back when he was still young and happy. Several years later, with life having addressed that, he took up writing and has since won awards for his short stories from both the National Association of Writers' Groups and the Lancashire Authors' Association. He has also had short stories published by Reader's Digest and Writers' & Artists' Yearbook amongst others, and his first novel *Havock* won Judges' Pick in Grindstone Literary's International Novel Prize.

Dan lives in West Yorkshire with his wife Angela and likes to spend time reading or watching a good sit com. The rest of the time he mostly does as he's told.
